Illustrated Checklist of Paleontology and Paleoanthropology related stamps

Last time updated: 12.05.2025.

The **Check-List** of official, local and some personalized postage stamps and associated philatelic objects related to Paleontology and Paleoanthropology topics.
You can print it and make notes under the images, or use the PDF version of this page and make notes in PDF editor software.
Example of the filled-out checklist is here.

Please consider the environment before printing, this list which will occupy almost 300 A4 pages, which might end up in the garbage bin at the end.
Do you really have to print it, or a digital copy (PDF or other formats) is good enough?
*Let's try to protect our environment, **save trees** for the next generations and reduce garbage we produce.*

The Status Legend proposal

"-" Don't have - Looking for

"--" Don't have it, but not interested

"+" Have it

"++" Have it and have some spares for trade.
e.g. "++2" have 2 items for trade

"+/-" Have it, but would like to replace it or get another one (don't mix it up with "+" and "-" underneath - the link to the item marked by "+")

"*" Ordered/swapped it, but not received it yet

Undesired stamps marked by the gray background.
In case the county printed too many "Paleo" stamps in the same year, all are shown on the same image, to push collectors attention and keep the size of the check-list.

In mixed sets with both relevant and irrelevant stamps, stamps irrelevant to the topic are shown in "black and white" in the preview image.

For more details about the stamps in the checklist, please:

- Click on the image to enlarge it.
- Click on the year number to see all relevant stamps of the year.
- Click on the country name under the preview image to be redirected to the country page.
  The country page contains a brief description of the county and its

Abbreviations

Mn: - MICHEL stamps catalog (Germany) number.

Sn: - Scott stamps catalog (USA) number.

N/L - Not Listed in the catalog

N/A

- N/A in the catalog numbers field - the catalog number is Not Available yet, but expected to be added later
- N/A in other fields - Not Available,
  e.g. FDC: N/A - FDC for this issue is not available / wasn't produced

? - The catalog numbers exist, but it is unknown to the author of this website. If you know the number, please share it with the author.

Set - stamps set or an individual stamp,
mnh - mint never hinged,
cto - cancelled to order,
usd - used (removed from a letter or postcard),
pf - perforated,
im - imperforate,
sa - self-adhesive,
co - coil, stamps from rolls
gp - gutter pair,
op - over printed / surcharged,
pr - promotial (black print, etc.),
prf - proof,
sp - specimen.

FDC - First Day Cover,
cl - clean,
ml - mailed / gone through the post

FDS - First Day Sheet

Cov - Mailed envelope or postcard with the relevant stamp(s)

MC - Maxi Card

MS - Mini-Sheet

SS - Souvenir-Sheet

SH - Stamps-Sheet

PP - Presentation Pack

philatelic services, a list of all philatelic products related to the topic of the website, as well as some brief comments about them.

- If a description of the issue is available, the title of the issue will be a hyperlink to the description. Almost 350 pages already exist and new articles are added regularly.
  In some cases, mostly for "other stamps to consider" category, the hyperlink of the title will show some comments on the country or year page.

BK - Booklet

BP - Booklet Pane

PB - Prestige Booklet

CF - Collector Folder / Pack (usually limited edition)

The History of Ichthyosaurs Discovery

Ichthyosaurs ("fish lizards") are an extinct group of aquatic marine reptiles (not fish nor lizards), who belong to the order known as **Ichthyosauria**. Ichthyosaurs, lived in the Mesozoic era from the Early Triassic to the Late Cretaceous, about 250 million to 90 million years ago and were contemporaries of the Dinosaurs. However, they died out about 30 million years before the extinction of Dinosaurs.
Ichthyosaurs are closely related to another aquatic group of reptiles the plesiosaurs. Both groups share some features of the skull (retaining the upper temporal fenestrae – openings in the skull behind the eye socket between the post-orbital and squamosal bones).
They are derived from a diapsid reptile ancestor and at some point in the lineage secondarily lost the lower set of temporal fenestrae. [Ref]

Prehistoric life in Mesozoic era on stamps of Nicaragua, 1994. Mich: 3372-3387, Scott: 2041. Ichthyosaur is on the third stamp in the third row from the top.

The ichthyosaurs through convergent evolution evolved a fish-like body adapted for living in water exclusively. By the end of the Triassic, ichthyosaurs had adapted to fully aquatic conditions with streamlined bodies, fins, and a sickle-shaped tail.
The fins and tail were used to propel the animals through the water when swimming. They were unable to return to land – and hence were unable to lay eggs on land like modern sea turtles do today. [Ref]

Unlike most prehistoric and living reptiles, ichthyosaurs carried their live embryos inside their bodies until birth. The young were laid side by side within their mother's womb with their snouts pointing towards their mother's head. It would be reasonable to assume that the ichthyosaurs had developed some form of placenta for the care of their young.
However, this hypothesis cannot be tested directly as the preservation of the fossils does not preserve enough detail.
Ichthyosaurs could, like some modern reptiles, have been ovo-viviparous, retaining the eggs in the body until they had fully developed.
The embryos would then have fed from the yolk of each egg. Just as they would if the egg had been laid on land.
Over 100 fossils of ichthyosaur mothers with embryos have been found to date. Some of these mothers had up to 11 babies!

Malaysia 2020, part of "Marine Life Definitive Series" stamps set. Mich: , Scott:

A new study confirms that the first ichthyosaur new-born came out snout first, possibly to avoid suffocation during birth.
Over time, ichthyosaurs become more adapted to giving birth in water – with younger, more advanced genera exhibiting new-born being born tail first, similar to modern dolphins and other cetaceans. It is thought that this adaptation developed to allow the new-born to more quickly swim to the water surface to breathe air. [Ref]

The History of the Discovery of Ichthyosaurs, with the list of Ichthyosaurs' stamps and postmarks.

Notes:

- stamps of Amiel machine printed big text
- stamps of SMD machine printed small text
- Distinguished from year 1999, in 2000 Escudo 85 stamps was available at ATM machines, as well as at philatelic desks of Portuguese Post.
- Amiel and SMD ATM machines at Philatelic Service Center programmed differently as similar machines at Post Offices. Stamps are issued by ATM machines at Philatelic Service Center used a point (".") as Euro value separator (€0.25 for example). ATM machines at Post Offices used a coma (",") as Euro value separator (€0,25 for example). Stamps with coma are more difficult to get and are more expensive according to Afinsa, national stamps catalogue.
- several currency conversion errors exist

Russia

On February 24th, 2022 Russian army invaded Ukraine territory and currently bombing peaceful cities and killing civilians all over the territory of Ukraine.
Please think twice if you want to buy anything from Russia, even some stamps or covers, and indirectly support their aggression against Ukraine, free and independent European country.

I'm, Michael Kogan admin and owner of this website, call all my visitors from around the world to **boycott Russia - don't give your money to the country to kill Ukrainian citizens and destroy Ukrainian cities**.

Russia, 03.06.2020 "Paleontologic Heritage of Russia"
Mn: 2871I-2874I, 2871II-2874II ; Sn: 8169a-d
Set: pf ; MS FDC-1: cl , ml FDC-2: cl , ml PB , Cov:
Notes: "I" regular issue, 60.000 sets were printed. "II" stamps with relief printing with lacquer coating, were issued on July 10th, 2022. "II" stamps were sold in presentation pack only, 11.000 sets were issued. Six commemorative postmarks of different cities introduced for the FDC. Many personalized FDC and postcards exist.
